SOUL OF THE FOREST CONTEMPORARY

Mosev

PINEA

A gentle vase with the structure and colour of a pine tree. Its archetypal shape and smoky-green hue are familiar to us. The freedom of craftsmanship, as well as the master cutters' soul and mood, is reflected in the dynamic cut. Thanks to them, every vase is unique.

CONEA

A delicate vase with the flawless structure of the Korean fir cone. This architecture possesses natural order and harmony. It has a powerful internal energy, with either a matte or velvety finish. The horizontal cut plays a magical game with the sun's rays in both the crystal and purple variations.

FUNGI

A graceful vase with a gentle cut of mushroom spores and a light-apricot colour. Perceiving its image is like reading an idyllic poem of nature. It's distinguished by the cutters' skill, who masterfully conveyed the fascinating natural structure in the crystal.

An elegant and light drinkware set with a vase. Its irregular, dynamic cuts evoke tree bark – natural and pleasant to the touch. These cuts serve to underscore the collection's honest craftsmanship. The glasses are perfect for all beverages, everything from whiskey to water. The graceful vase is suited to one or even a pair of flowers. The drinkware set is a limited edition available until September 30, 2024.

MICROCOSMOS

This gentle, spellbinding vase is a masterful union between traditional art and modern design, with a new-age, authorial illustration. It depicts a microscopic perspective of the forest depths, a never-ending story. The vase is a limited edition of 25 pieces.

"Microcosmos is like a virtuosic composition that gradually goes from the simplest of tones to the most challenging. From a natural material, to the work of the glassmakers and engravers, all the way to the noble charm of hands touching the finished piece," describes the illustration's author, Michal Bačák.

DESIGN

Unique people have left their imprints on this unique collection. Talented, strong, courageous. The master glassmakers, cutters, and engravers who have passed down the art of craftsmanship at Moser for generations. Their works fascinated by natural structures and archetypal shapes are united with modern design in flawless harmony.

"Every time I step into the forest, I feel happy. I strive to always be in contact with nature. I'm grateful that I could imprint the pleasant feelings I experience in the forest into the new collection," says Jan Plecháč.

The designer and current Art Director of Moser has received several international and domestic awards for his work and signed his name under world-class projects.
